PROFILE

Aspiring Full Stack Developer with academic experience in Java, Spring Boot, and frontend development. Eager to apply coding skills, learn from real-world projects, and contribute to building effective software solutions.

PROJECTS

Hospital Management System

- **Technologies Used:** Java Servlet, JSP, JDBC, MySQL
- Developed a comprehensive web application to manage hospital operations, including patient records, doctor appointments and billing.

Expenses Tracker

- **Technologies Used:** Java Servlet, Hibernate
- **Objective:** Developed a web-based expenses tracking system that allows users to record, categorize, and analyze their daily expenses efficiently.

Smart Contact Manager

- **Technologies Used:** Java Spring Boot, Thymeleaf, JPA
- Built a secure, user-friendly web application to manage and organize personal contacts.
- Implemented authentication, along with CRUD operations for seamless contact management.

SKILLS

- **Languages:** Java, SQL
- **Web Development:** HTML, CSS, JavaScript, ReactJS (Basic)
- **Frameworks:** Spring Boot, Hibernate
- **Tools:** Git, GitHub, Postman, Swagger, Power BI
